

Clifton Health Department Food Recall Notification

Food/Drug/Pet Recall: Sunshine Mills, Inc.

Sunshine Mills, Inc. is issuing a voluntary recall of certain dog food products because of the potential to be contaminated with Salmonella. No illnesses, injuries or complaints have been reported to date. The potential for contamination was noted after the firm was notified by the distributor, Fleet Wholesale Supply Company, who was informed by Minnesota Department of Agriculture when a sample of 5 lbs. Sprout Sporting Dog Food product was collected and tested positive for Salmonella during routine surveillance.

Salmonella can affect animals eating the products and there is risk to humans from handling contaminated products, especially if they have not thoroughly washed their hands after having contact with the products or any surfaces exposed to these products.

Healthy people infected with Salmonella should monitor themselves for some or all of the following symptoms: nausea, vomiting, diarrhea or bloody diarrhea, abdominal cramping and fever. Rarely, Salmonella can result in more serious ailments, including arterial infections, endocarditis, arthritis, muscle pain, eye irritation, and urinary tract symptoms. Consumers exhibiting these signs after having contact with this product should contact their healthcare providers.

Pets with Salmonella infections may be lethargic and have diarrhea or bloody diarrhea, fever, and vomiting. Some pets will have only decreased appetite, fever and abdominal pain. Infected but otherwise healthy pets can be carriers and infect other animals or humans. If your pet has consumed a recalled product and has these symptoms, please contact your veterinarian.

The best buy date and lot code can be found on the back of each package. The products identified below were distributed online and in retail stores:
