

Clifton Health Department Food Recall Notification

Food/Drug/Pet Recall: Abbott

Abbott is initiating a voluntary recall of powder formulas, including Similac, Alimentum and EleCare manufactured in Sturgis, Mich., one of the company's manufacturing facilities. The recall does not include any metabolic deficiency nutrition formulas.

Abbott is voluntarily recalling these products after four consumer complaints related to *Cronobacter sakazakii* or *Salmonella* Newport in infants who had consumed powder infant formula manufactured in this facility.

Additionally, as part of Abbott's quality processes, the firm conducts routine testing for *Cronobacter sakazakii* and other pathogens in its manufacturing facilities. During testing in their Sturgis, Mich., facility, they found evidence of *Cronobacter sakazakii* in the plant in non-product contact areas. They found no evidence of *Salmonella* Newport. This investigation is ongoing.

Importantly, no distributed product has tested positive for the presence of either of these bacteria, and the firm continues to test. Abbott conducts extensive quality checks on each completed batch of infant formula, including microbiological analysis prior to release. All finished products are tested for *Cronobacter sakazakii*, *Salmonella* Newport and other pathogens and they must test negative before any product is released. Additionally, retained samples related to the three complaints for *Cronobacter sakazakii* tested negative for *Cronobacter sakazakii*. And the retained sample related to the complaint for *Salmonella* Newport tested negative for *Salmonella* Newport.

While Abbott's testing of finished product detected no pathogens, they are taking action by recalling the powder formula manufactured in this facility with an expiration of April 1, 2022, or later. No Abbott liquid formulas, powder formulas, or nutrition products from other facilities are impacted by the recall.

Cronobacter sakazakii is commonly found in the environment and a variety of areas in the home. It can cause fever, poor feeding, excessive crying or low energy as well as other serious symptoms. It's important to follow the instructions for proper preparation, handling and storage of powder formulas.

What Parents and Caregivers Should Do

The products under recall have a multidigit number on the bottom of the container starting with the first two digits 22 through 37, contains K8, SH, or Z2 and with an expiration date of April 1, 2022, or after.

To find out if the product you have is included in this recall, visit similacrecall.com and type in the code on the bottom of the package, or call +1-800-986-8540 (U.S.) and follow the
