The products subject to recall do not bear the USDA mark of inspection because Mitten Gourmet, LLC, is not a federally inspected establishment. These items were shipped to retail locations nationwide.

The problem was discovered during routine FSIS surveillance activities when the ready-to-eat pork rind products were observed for sale without the USDA mark of inspection. FSIS determined that the producer is not an FSIS-inspected facility.

There have been no confirmed reports of adverse reactions due to consumption of these products. Anyone concerned about a reaction should contact a healthcare provider.

FSIS is concerned that some product may be in consumers' pantries. Consumers who have purchased these products are urged not to consume them. These products should be thrown away or returned to the place of purchase.
